

Sakura Launches Integrated Online Payroll and Tax Service with OnlinePajak

Jakarta, 10 August 2020 – PT. SAKURA SYSTEM SOLUTIONS announced the launch of Integrated Online Payroll and Tax Service in collaboration with OnlinePajak.

Increasing tax revenues has been an important national challenge of Indonesia Government for a long time, and online taxation is being promoted to improve the tax capture rate. However, as the taxation process is still complicated, the need for more efficient, faster, and easier taxation solutions is strong in Indonesian companies.

Sakura is an affiliate company of NS Solutions Corporations, Japan's leading System Integrator, and has introduced the in-house developed HR & Payroll system, "SPISy" in Indonesia for more than 20 years.

OnlinePajak is an online tax platform provided by PT. Achilles Advanced Systems (Achilles), and it is used by more than 400,000 companies, the largest number in Indonesia. Users of OnlinePajak can complete tax calculations, payment and filings online without going to the tax office.

This time, Sakura and Achilles have started system collaboration between SPISy and Online Pajak. As a result, SPISy users can seamlessly connect attendance management, payroll calculation, personal income tax calculation, tax payment, and tax reporting on the system, streamlining personnel operations, preventing tax payment overs and shorts due to calculation errors, and avoiding payment delay penalties. Even companies that currently take remote work policy because of COVID-19 pandemic are able to carry out tax duties smoothly from remote areas. Increasing the added value through this new service, Sakura aims to support HR operation of more companies.

Sakura and Achilles will continue to strengthen the quality and cooperation of both services and contribute to the efficiency and sophistication of business operations.

"We are glad to welcome Sakura into our partners ecosystem," says Charles Guinot, CEO of PT. ACHILLES ADVANCED SYSTEMS. "As a startup we have to remain focused on one thing and do it well, for us, this is tax. However, we strongly believe that there is a need for an end-to-end productivity ecosystem for Indonesian companies. Integrating with best-in-class software companies such as Sakura is our way to deliver a complete HR / Payroll solution to all our clients."
