

Sakura Achieves ISO 27001 : 2013

Jakarta, 29 November 2022, PT. Sakura System Solutions has successfully implemented an **information security management system**. The implemented system has been tested by TÜV Rheinland through and supported by Proxisis Consultant as an ISO advisor.

ISMS is an interrelated work system with organizations or companies, whose function is to manage and control information security risks to protect and maintain the confidentiality, integrity and availability of data and information within the organization. ISO/IEC 27001:2013 certificate is an information security standard launched in September 2013 as an update from previous version in 2005. This certification was established by the International Organization for Standardization (ISO) and the International Electronic Commission (IEC). Both institutions

created or establish a standard information security management system or ISMS (Information Security Management System). Companies that have received ISO/IEC 27001:2013 certificates have successfully implemented the ISMS standard in maintaining the security of their company data, in which the implementation process has been tested by an independent team.

PT Sakura System Solutions is an affiliate company of NS Solutions Corporations, Japan's leading System Integrator, and has introduced the in-house developed HR & Payroll system, "SPISy HRIS" in Indonesia for more than 24 years. As an IT company that provides IT solutions in the human resources sector, security data is important part of SPISy HRIS, because the data managed by SPISy HRIS will related to confidential data in the organization such as personal information and salary data from all employees.

The success of obtaining ISO 27001 : 2013 is one of the proofs for all of PT. Sakura System Solutions customers and HR practitioners in Indonesia, where SPISy HRIS is consistent in innovating to improve service quality.
